

PSYCHOLOGICAL TESTING INSTRUMENTS & DEVICES

2021.

Valid to: 30. 09. 2021.

Type	Name	Net price
EM-05.06 	Cage type Bogen-Lipmann ✓ <i>Work method with devices, coordination of arm-hand motions, attitude towards work. With built-in LCD timer.</i>	766,-€
EM-05.16 	Thread-table type Moede ✓ <i>Hand-motion dexterity, quality of dynamic work, accuracy and ability of perception. With built-in LCD timer</i>	784,-€
EM-05.18A	Manual dexterity tester type Ricossay <i>Manipulative actions of finger motions, precision, one's reaction to success / failure. With built-in LCD timer.</i>	1.106,-€
EM-05.27B	Micromanipulation tremor meter ✓ <i>Measurement of static and physiological hand, arm and finger tremor. Hand tremor, security of hands, health of nervous system, fatigue, drug effect, alcohol effect.</i>	1.666,-€
EM-05.40CX 	Psychocomb <u>Complex tester device with 14 psychological test programs:</u> <ul style="list-style-type: none"> - Choice Reaction Time measuring with colors. - Choice Reaction Time measuring with figures. - Attention test type Pauli. - Intelligence test type Raven. - Test of learning process. - Test of information processing. - Categorization test of even-uneven. - Short term store (STS) test. - Mathematical and logical sequence test. - Information processing test type Stroop. - Test of spatial vision and perception. - Intelligence test type domino. - Correction test. - Perception test. 	Under development!
EM-05.47M	Stabilometer M (all in one) ✓ <i>Stability perception of oneself, complex performance of the posture, stable standing, correction of stability holding and ability. Grants full functionality, it is applicable for mobile usage, designed for 'all-in-one', with built-in evaluation and data storage software, optional printer connection, LCD monitor.</i>	2.156,-€
EM-05.48C	Attention ability tester <i>Long term and focused tenacity of attention, fluctuation of attention performance, short term store (STS), thinking forward, strategy.</i> <u>With 4 distinct programs:</u> <ul style="list-style-type: none"> - Number finding test type Poppelreuter. - Attention and memory test type Kóródi (legacy of Platonov). - Test of attention and risk-taking type Lacho. - Number finding random test. 	1.778,-€

Type	Name	Net price
EM-05.52	Hand-coordination tester <i>Bimanual hand coordination, soft, difficult manipulative action, regulation of working processes, attributes of personality, tolerance of frustration.</i>	1.764,-€
EM-05.54/55	Combined distributive attention tester CDT-1/CDT2 <i>Combined tester of the one-handed main device (CDT-1) and the two-handed expansion (CDT-2) device. Distributive attention, motor coordination led by perception, positional spatial imagination, speed of information processing, tolerance of monotony, psychic tempo, trainability Bimanual regulation of motion, optomotor coordination, spatial vision, accuracy of response, distributive attention, tolerance of frustration, performance.</i>	2.373,-€
EM-05.56	Perception and disjunctive reaction meter MPR <i>Perception and disjunctive reaction time meter with central and peripheral exposition of stimuli, one-handed and two-handed functions. Speed of motion, concentration of attention, perception of optical stimuli, mode of perception and responding ability, with fix and random-timed tests.</i>	1.792,-€
EM-05.58K	Complex sensomotorial tester & conflict meter ✓ <i>Accuracy and speed of responses with hand and feet, tests with demanded performance. Programs with automatic and manual stimuli expositions, difficulty options. Tests of conflicting, 'go – no go', complex, choice and simple reaction time, quality of information processing, recognizing color blindness.</i>	2.646,-€
EM-05.62	Galvanic skin-response & heart-rate meter <i>Determining the activation level of the nervous system with the measuring and registering of the skin resistance and heart-rate. With combined sensor and built-in registration device.</i>	2.002,-€
EM-05.66	Biofeedback device <i>For training and auditory relaxation exercises.</i>	161,-€
EM-05.74	Tachistoscope (for individual tests) ✓ <i>Tenacity of attention, memory, identifying and processing of short term stored information. Spatial localization, visual search, memory search, detection of irregularity, paper-pencil tests. Percent evaluation of mental attention performance.</i>	2.003,-€
EM-05.74P	Tachistoscope Periphery (for group tests) ✓ <i>Short term store, attention and vigilance tests, with three distinct programs (and two expansions, more difficult versions of the main programs), optional group testing, for general and traffic psychology situations. This device works only with the main tester type EM-05.74.</i>	1.176,-€
EM-05.79	Logical pyramid <i>Building exercise with disks for testing and training of logical and thinking skills. Problem-solving ability, thinking forward and strategy. With built-in LCD timer</i>	224,-€
EM-05.82	Working probe type Bonnardel (disk test) <i>Rule of thumb and perception tester. Observation ability, rule of thumb and combining skills. With built-in LCD timer.</i>	385,-€
EM-05.87A	Depth-sightedness Tester <i>Quality of depth of field perception, avoiding secondary criteria.</i>	1.386,-€
EM-05.91	Working probe type Crawford <i>Hand dexterity, working speed, specialties of working method, fingers dexterity, working with small parts, skills with tools, performance, abiding rules of work. With built-in LCD timer.</i>	672,-€

Type	Name	Net price
EM-05.92	Response tester ✓ <i>Aptitude tests related to general and traffic psychology, special optical and acoustic stimuli and disturbing effects. Eye, hand and feet coordination, speed and accuracy of responses in complex situations.</i>	6.003,-€
EM-05.93	Combined driving simulator ✓ <ul style="list-style-type: none"> ◆ Tracking simulator ◆ Sensorimotor coordination simulator <i>Programs with factory settings and optional reprogrammable function, professional bus seat, wheel, hand and feet consoles, color LCD monitor, automatic and manual modes, displays norms and results with graphics, can store test results, automatic report printing.</i>	9.194,-€
EM-05.93SX	Combined driving simulator (extra special) ✓ <ul style="list-style-type: none"> ◆ Tracking simulator ◆ Sensorimotor coordination simulator ◆ Speed Distance Timing Tester <i>Programs with factory settings and optional reprogrammable function, professional bus seat, wheel, hand and feet consoles, color LCD monitor, special KFF compatible wall unit (LED1, LED2), automatic and manual modes, displays norms and results with graphics, can store test results, automatic report printing.</i>	13.486,-€
EM-05.94QDS	Speed distance & timing tester (quick, desktop, special) ✓ <ul style="list-style-type: none"> ◆ Wall unit ◆ Hand lever and pedal consoles <i>Device with intelligent tester and controller, wide scale of variations of stimulus speed, position and starting position, factory and programmable 'avoiding', 'crashing', 'tunnel' programs. Hand and feet consoles, color LCD monitor, special KFF compatible wall unit (LED1, LED2), automatic and manual modes, displays norms and results with graphics, can store test results, automatic report printing.</i>	6.908,-€
EM-05.98	Learn & memory tester & labyrinth test (all in one) <i>Memorizing paths (cognitive map), attention activity, learning memory, mental specifications. Displays basic statistics with standardizing programs, easy and more level difficulty options, acoustic reactions for assistance. Full functionality, for mobile usage, all-in-one designed, built-in evaluation and storing software, optional printer connection, LCD display.</i>	2.016,-€

Recommended accessories:

Type	Name	Net price
AUT-4X1	Data switch unit with cables <i>Multipliable, can deal with up to 4 pcs of psychological instruments for practical and economical switching of devices and a printer.</i>	128,-€
Laser printer	Compatible laser printer with cable <i>High-powered printer, reliable, economic, long operational time, for printing test results.</i>	197,-€

 The given net domestic (EXW) end user prices include user manual and psychological methodic.

Dear Customer,

Our company attaches detailed manuals to our psychological devices which contain the theoretical basics of one instrument and its methods of psychic functions, the conditions of tests, the instructions, the methods of making statistics of the measurements and given results, and a couple of standards and norms which are based on the Hungarian population and are only additional information for interpreting the test results. (We strongly advise our customers to make their own standards for the accurate diagnosis!)

Our testing methods and the methodological details, the standards and their validation are based on the professional works and writings of Levente István Fruttus Dr., psychologist expert.

The ✓ marked instruments fit the applications of general purposes of work psychology and the requirements of the decree of 41/2004. (IV. 7.) GKM about the prior and periodical aptitude of professional drivers. Furthermore, these marked devices are suitable for the testing of the staff of the army, law enforcement, prison service, the apprentices of law and military schools, and the drivers of these institutions according to the complex decree of 24/2002. BM-IM-MeHVM.

All the instruments of STRUKTÚRA are synchronous with the requirements of OMFI regulations determining the conditions of testing with psychological devices, and according to these regulations, they fit the tenets of technical labs for evaluating the weapon holding of group I. and II. based on the decree of 9/2010. (III. 18.) EüM and the complex decree of 78/1999. (XII. 29.) EüM-BM. Furthermore, our devices are in accordance with the mentioned complex decree of a 78/1999. (XII. 29.) EüM-BM of the aptitude tests of public space surveillance staff.

If our customers need, our company will install the devices in the wished place as well, and we could also present the operation of the instruments.

We are ready to diagnose faults and repair any device sold by STRUKTÚRA Instruments Company in the period of warranty and beyond. Moreover, we provide service, maintenance and long-term replacement of any parts.

We strongly advise you to ask us before buying or using a printer, we would help you to decide which type to choose for optimal functioning.

Furthermore, we are ready to help our customers with the questions of practical usage, designing labs and technical assistance.
